Placeholder / Mock Images — To Replace with Real Images

1. Public Directory Files (Unused or Replaceable)

File	Description	Status
<code>public/placeholder.jpg</code>	Generic placeholder	Unused in source
<code>public/placeholder.svg</code>	Generic SVG placeholder	Unused in source
<code>public/placeholder-logo.png</code>	Logo placeholder (PNG)	Unused in source
<code>public/placeholder-logo.svg</code>	Logo placeholder (SVG)	Unused in source
<code>public/placeholder-user.jpg</code>	User avatar placeholder	Unused in source
<code>public/icon.svg</code>	Default site icon	Unused — replaced by <code>favicon.jpeg</code>
<code>public/icon-light-32x32.png</code>	Light-mode 32×32 icon	Unused

File	Description	Status
<code>public/icon-dark-32x32.png</code>	Dark-mode 32×32 icon	Unused
<code>public/apple-icon.png</code>	Apple touch icon	Unused — replaced by <code>favicon.jpeg</code>

2. Metadata — Open Graph / Social Card Images

File	Location	What's Missing
<code>app/layout.tsx:24-31</code>	Open Graph metadata block	No <code>og:image</code> URL set
<code>app/layout.tsx:32-36</code>	Twitter card metadata	No <code>twitter:image</code> URL set

Action: Add `/og-image.jpg` (1200×630px recommended) and reference it in both `openGraph.image` and `twitter.image`.

3. About Section — Team Member Photos

File: `components/about-section.tsx`

Placeholder	Lines	Description	Suggested Real Image
Esther photo	127–136	CSS gradient + <code>Heart</code> icon (warm tones)	Real photo of Esther Epoh Abeng
Nathanael photo	160–170	CSS gradient + <code>Heart</code> icon (gold tones)	Real photo of Nathanael Epoh Abeng

Both use `<div>` with a `bg-gradient-to-br` and a `lucide-react Heart` icon as visual stand-ins.

Action: Replace each gradient div with `<Image src="..." alt="..." width={...} height={...} className="..." />`.

4. Gallery Section — 6 Placeholder Cards

File: `components/gallery-section.tsx`

ID	Type	Category	Aspect Ratio	Gradient Used	Suggested Real Image
1	Image	Couple	Tall	<code>from-primary/30 via-primary/20 to-gold/30</code>	Couple photo (vertical)
2	Video	Faith	Wide	<code>from-gold/30 via-gold/20 to-primary/30</code>	YouTube/Facebook sermon thumbnail
3	Image	Beauty	Square	<code>from-primary/20 to-gold/20</code>	Beauty / makeup photo
4	Image	Home	Square	<code>from-gold/20 to-primary/20</code>	Home / lifestyle photo
5	Video	Couple	Tall	<code>from-primary/30 to-gold/20</code>	TikTok couple video thumbnail
6	Image	Faith	Wide	<code>from-gold/30 to-primary/20</code>	Worship / faith photo (landscape)

All use CSS gradients + dot pattern as visual placeholders — no `<img>` tags exist.

Action: Add an `image` or `thumbnail` field to each item in `galleryItems`, then render with `<Image>` inside each card. The lightbox (lines 240–272) also needs a real image/video embed.

5. Video Showcase Section — 3 Video Thumbnails

File: components/video-showcase.tsx

ID	Title (EN)	Platform	Gradient Used	Suggested Real Image
1	Our Marriage Journey	YouTube	from-red-500/20 to-orange-500/20	YouTube video thumbnail
2	Faith in Marriage	Facebook	from-blue-500/20 to-indigo-500/20	Facebook video thumbnail
3	Beauty Tips	TikTok	from-pink-500/20 to-purple-500/20	TikTok video thumbnail

Each uses a gradient background + Play icon — no actual thumbnail.

Action: Add a thumbnail field to each item in featuredVideos, render with <Image>.

6. Brand Logo

File	Notes
zDocs_Abeng/epohabeng-website-logo.jpeg	Actual logo file (outside public/)

Action: Copy to public/logo.jpeg and reference it (e.g., in a header/nav component or as OpenGraph site logo).

Summary Table

Category	Count	Current State
Public placeholder files	9	Unused in source
Metadata social images	2 (og + twitter)	Missing — no URL set
Team member photos	2	CSS gradient placeholders
Gallery items	6	CSS gradient placeholders
Video thumbnails	3	CSS gradient placeholders
Brand logo	1	Outside public/, not referenced

Category	Count	Current State
Total	23
